

The Journal of Conformity Assessment, Management and Engineering (JCAME) is an international, peer-reviewed journal for conformity assessment, management & engineering academics and practitioners. JCAME aims to contribute substantially in the following areas, but not limited to:

1. Conformity Assessment Methods and Techniques
2. Quality Management Systems
3. Standards and Regulatory Compliance
4. Risk Assessment and Management
5. Process Improvement and Optimization
6. Supply Chain Management, Maritime & Logistics
7. Reliability and Maintenance Engineering
8. Sustainability and Green Technologies
9. Innovation in Engineering and Management Practices
10. Digital Transformation in Conformity Assessment and Management

by providing a high-quality medium for the dissemination of new knowledge and methods. Among JCAME's targeted audience are conformity assessment, supply chain, engineers and management scholars, practitioners and other interested groups and individuals.

The main conformity assessment fields that are covered, among others, include testing and calibration laboratories, inspection bodies, product certification bodies, management system certification bodies, organizations offering certification of persons, engineering and training course developers and providers.

JCAME is a signatory of The BOAI statement of principle and strategy, commitment. The initiative was signed by the Budapest participants and thousands of individuals and organizations from around the world who represent researchers, universities, laboratories, libraries, foundations, journals, publishers, learned societies, and kindred open-access initiatives.
